LIGHTING

WELCOME TO **OUR WORLD**

PRODUCT PRICE LIST - Effective from 1st Jan 2023

MAGIK
LIGHTING

Lights are an important part of our lives, we all know that. But I had never really fathomed their importance with respect to changing the look of your spaces completely, until last year. 2021 marked the year of my introduction to Magik Lighting and a complete change in my outlook regarding lights. And hence, I joined hands with Magik Lighting to start this illuminating revolution in India.

Magik Lighting is the largest manufacturer of LED lights in Eastern India. They have their own production facility and an NABL-accredited lab nestled in the heart of Bengal. It is truly endearing to see a brand from our neighbourhood reach such heights.

And obviously, such a feat is not possible to achieve without top-of-the-line products that come in every shape and form in over 750+ variants. From indoor usage to outdoor lighting, home décor to office renovation, they have lighting solutions for all. And I can vouch for it, since my own office is completely revamped with quality lights from Magik.

Now, like me, you too can light up your spaces with 750+ top quality solutions…**Magik se.**

Sourav Ganguly
*Brand Ambassador of Magik Lighting*

CENTURY LED LTD.

We, at Century LED Ltd., have always strived to understand the needs of our consumers and offer solutions that are best in class, consumer-friendly and delightful. Each product in our MAGIK LED range has been carefully crafted and designed to cater all kinds of lighting needs in industrial, outdoor, retail and home segments. Our easy to fit products come in varied sizes and shapes, and last longer than ordinary LEDs.

MAGIK has stayed true to its name when it comes to lighting. With meticulous design process and state-of-the-art manufacturing technologies, it never fails to transform your ambience and LIFTS YOUR SPACES and mood. Every corner of your room, every part of your living feels new and refreshing under the shine of MAGIK. And we aren't satisfied and settled with this much. We hope to surprise our consumers even more with newer products. We are relentlessly redefining our technology and keep rediscovering our potential to make your every day and night delightful.

MAGIKAL MECHANISM

We are proud to design our every product at our own design lab in Kolkata, where every parameter is planned and monitored minutely. Our R&D engineers take extra care while selecting the LEDs. They never compromise on luminosity and colour accuracy. The lights are then assembled inside specially designed casings which help in proper heat dissipation. The electronic driver is designed to withstand the harsh electrical voltage variations of Indian climate. Finally, each product is tested by our in-house Goneophotometer to ensure proper light output, making it truly worthy of your beautiful home.

Magik products use LEDs from only selected LED bins to deliver high-efficiency products, as LED
components vary from each other in terms of colour rendition, forward voltage and flux, even within the same production batch. Installed in an enormous dark room, our MIRROR GONEO PHOTO METER tests and records data on the luminous intensity distribution curve, effective angle and beam angle, total luminous flux, light efficiency, utilization factor, current, voltage, power and power factor amongst other parameters. This data helps us provide you with the optimum lighting solutions.

MAGIKAL CREATION

Century LED is one of the very few companies to enter the lighting sector with its own state-of-the-art manufacturing unit. At our manufacturing unit, an automated SMT section prepares all the LED units and electronic drivers. Then, semi-automated assembly lines in our plant produce high quality bulbs, battens, tubes, street lights, panels and down-lights. To provide a sense of consistency across all our products, we incorporate strict manufacturing disciplines into all our production processes; thus, leading to fewer mistakes and variations. Moreover, this helps us in delivering high quality products with optimum input costs. Our products are not just best-in-class, they are also a part of the national initiative to foster innovation and skill development, thus contributing in the noble initiative of MAKE IN INDIA.

An automated printer first applies glue on pre-designated locations of a PCB, which then passes through an automated line onto a pick and place machine which places the LED packets along with other components on the board. The PCB then passes through a Re-flow Oven, where it is baked to form the desired PCB for a given product. Our quality management system ensures rigorous performance tests using various NABL-worthy testing equipment and gives us the confidence to provide a 2-year replacement warranty across our portfolio. All our products go through an ageing test where they are subjected to extreme voltage, high temperature, frequent switching on and off before they are packed for the market.

OUR
MANUFACTURING
UNIT

Each product in the MAGIK LED range has been carefully
crafted and designed to cater to all kinds of lighting
needs in industrial, outdoor, retail and home
segments. Our easy to fit products come in
varied sizes and shapes, and last longer
than ordinary LEDs.

- High quality optical lens and robust design makes it an indispensable lighting tool for highlighting task.
- This fixture offers the necessary optical freedom and flexibility to meet the needs of a wide variety of lighting applications.
- High efficiency driver makes it a wise choice for industrial applications.
- It is a direct replacement of traditional HID fixtures.
- Breathing port (pressure equalizer valve) for better IP protection
- Available in different beam angle.

Prism Pro T5 LED Tube

- Prism Pro T5 led tube is designed for direct replacement of existing T5 fluorescent lighting systems.
- These tubes are ideal solution for customers who have high light   output requirements and want to maximize value over lifetime.
- Full energy savings & longer lifetime results in attractive payback times and TCO (Total Cost to Operate) benefits.
- Comes with an external driver
- High efficacy poly carbonate diffuser with aluminium heat sink for efficient heat dissipation

Azure Slim Downlighter Square

- Azure Slim led down light is slim and stylish designed.
- High performance and high transmittance PMMA diffuser allows optimum light out put with high uniformity.
- With unique surface ring, any existing downlight can be easily insert inside the ring for surface application
- Suitable for both surface mounting & recess Mounting

PRODUCT FEATURES:

- System Efficacy >100lm/w
- AC 120 -300 V ,50 Hz.
- 25,000 hr
- CRI 80+
- IP 20

APPLICATIONS:

- GYM/ SPA
- OFFICE
- SHOPS
- BANKS
- INDUSTRIES
- HOMES

Presenting

a new and innovative way
to light your home right!

To give you a visual experience of how a lighting plan will beautify your home, Magik presents LEDpedia. It's an innovative platform where you can simply pick the size of the room and try different lighting options before choosing the best one. Saving on your time, LEDpedia provides a close-to-real view of the best lighting solutions.

For any other variant / requirement please get in touch.
